remote sensing of climate provides cutting edge techniques in remote sensing of
climate variability and the environment the book focuses on methods and data
analytics advancements in scientific research in the field and further proffers
recommendations on the possible knowledge gaps and future scientific research
directions it covers eight key themes of remote sensing and climate variability
including discussions on how the various aspects from each chapter of the
themes interrelate it also integrates several divergent perspectives on remote
sensing and climate variability and the environment to show the interrelationships
between the perspectives this is an important reference for those in education
and research working on remote sensing and climate science who need methods
data analytics case studies research strides and key knowledge gaps in the field
discusses advancements and future research directions in remote sensing for
climate variability in a variety of environments includes simplified and condensed
methodologies and data analytics provides case studies on remote sensing of

climate variability both of the northern hemisphere temperate systems which are little affected by climate variability and the greater impacted global south

metal based anticancer drugs are among the most successful therapeutic agents as evidenced by the frequent prescription of selected platinum and arsenic compounds to patients metal based anticancer agents covers the interdisciplinary world of inorganic drug discovery and development by introducing the most prominent compound classes based on different transition metals discussing emerging concepts and enabling methods as well as presenting key pre clinical and clinical aspects recent progress on the unique features of next generation targeted metal based anticancer agents including supramolecular coordination complexes used for both therapy and drug delivery promise a bright future beyond the benefits of pure cytotoxic activity with contributions from global leaders in the field this book will serve as a useful reference to established researchers as well as a practical guide to those new to metallodrugs and postgraduate students of medicinal chemistry and metallobiology

this book provides an exclusive and critical in depth analysis of paddy straw waste valorization at a broad scale for different industrial applications it explores and discusses the various valorization pathways of paddy straw into valuable products connected to biorefineries products and byproducts the book also examines the scope potential and availability of paddy straw in the field of biorefineries various lignocellulosic biomasses with expanded potential are known for their industrial applications even at a broad pilot range among these biomasses paddy straw has emerged as the most suitable lignocellulosic waste for various biorefinery applications paddy is a crucial and widely consumed crop globally and it generates the highest annual production of waste compared to other cereal crops the cellulose content accounting for approximately 47 of the

total cellulosic biomass offers significant potential for valorization along with hemicellulose and lignin which can also be explored and expanded on an industrial scale however despite the tremendous scope for valorization lignocellulosic biomass based biorefineries face cost effectiveness challenges that need to be addressed for sustainable and uniform expansion distribution and economic scalability in various applications the book s specific feature lies in its targeted and specific valorization of paddy straw into biofuels and other biorefinery based products which hold promising industrial applications and easily scalable approaches for mass production this book is an essential resource for students scientists engineers and practitioners working in the biorefinery industry and academia

gold nanoparticles nanomaterials and nanocomposites science technology and applications provides a comprehensive review of recent research developments in the synthesis processing functionalization characterization and properties of gold nanoparticles au nps for a broad range of different applications emphasis is placed on the fundamental chemistry different synthesis approaches strategies for stabilization and control of shape size and morphology surface chemistry and physicochemical characteristics as well as surface functionalization and applications of au nps the book also covers important topics such as biocompatibility biodegradability cytotoxicity and the health and environmental impact of au nps the book will be a valuable reference resource for academic and industrial researchers working in the fields of materials science and engineering nanomaterials polymer composites and biomedical engineering it will help them to find solutions to both fundamental and applied problems associated with this important research field and it will also enable new researchers to become acquainted with this field within a short period covers current and emerging research trends in the synthesis processing functionalization characterization and performance of gold nanoparticles au nps includes comprehensive coverage of a broad range of applications such as sensing and biosensing electronic devices electro and photocatalysis solar cells supercapacitors point of care diagnostic

tools and devices drug delivery and controlled drug release antimicrobial antifungal and antiviral applications cancer diagnostics and therapy tissue engineering bioimaging as well as for bioremediation and pharmaceutical applications contains contributions from leading researchers across the globe from academic industrial government and private research institutions
