respiratory neurobiology physiology and clinical disorders part two volume 189 is one of two volumes on the neurology of breathing this volume focuses on pathologies attributable to abnormalities of the neural control of breathing breathing problems that may occur in neurological diseases and the neurological complications of respiratory diseases while volume one focuses on the neurophysiology of breathing explores the assessment and treatment of neural disorders of breathing identifies neural complications of respiratory diseases includes sids stroke parkinson s dementia epilepsy muscular dystrophy and more hydrogels are highly hydrated three dimensional networks with the ability to

mimic the extracellular matrix of bodily tissues and have thus found application in a wide range of biomedical applications unique physiochemical properties such as biocompatibility water permeability stimuli responsiveness and self healing characteristics make them especially useful for use as scaffolds and matrices drug delivery tissue engineering regeneration and sensing their weak and brittle nature however often limits their widespread application where improved mechanical strength is required to resolve this problem there has been a significant amount of research into the improvement of their mechanical properties among these efforts versatile multicomponent hydrogels have received much attention as their physiochemical properties can be structurally engineered to provide a wide range of desired properties these multicomponent formulations also allow for the combination of natural and synthetic polymers which offers the scope to exploit the advantages of each component with the synergistic effects resulting from mutual interactions this book critically discusses the fundamental chemistry synthesis characterisation physiochemical and biological properties of various types of multicomponent hydrogels it reviews the different strategies employed in designing and synthesizing cutting edge multicomponent hydrogels and their key applications in biomedical fields the work is suitable for researchers working in the specific area of multicomponent hydrogels and also more generally for those working in materials science biomedical engineering biomaterials science and tissue engineering

this paper describes and tests a new psychological theory of dimensional integrality integrality refers to the phenomenon of physically independent dimensions appearing fused into a single perceptual attribute such that the physically separable dimensions are not perceptually separable the theory proposes that all stimuli are perceived as combinations of perceptually independent dimensions but that for integral stimulus sets the perceptual dimensions do not correspond to the physically independent dimensions integrality is demonstrated psychophysically by interaction in psychological

similarity space between physically independent dimensions

conifers include a wide range of species that are spread all over the world these species have wide diversity variable stand structures ranging from monospecific monocohort to multispecific multicohort and produce an assortment of products and services the most frequent of which is timber this book is a collection of contributions both reviews and research studies from different fields and perspectives on the management regeneration growth diversity and production of conifer stands the book also addresses the effect of wildfires on conifer ecosystems and respiratory allergies to conifers

this comprehensive account of the human herpesviruses provides an encyclopedic overview of their basic virology and clinical manifestations this group of viruses includes human simplex type 1 and 2 epstein barr virus kaposi s sarcoma associated herpesvirus cytomegalovirus hhv6a 6b and 7 and varicella zoster virus the viral diseases and cancers they cause are significant and often recurrent their prevalence in the developed world accounts for a major burden of disease and as a result there is a great deal of research into the pathophysiology of infection and immunobiology another important area covered within this volume concerns antiviral therapy and the development of vaccines all these aspects are covered in depth both scientifically and in terms of clinical guidelines for patient care the text is illustrated generously throughout and is fully referenced to the latest research and developments

the issue of overflowing landfills and environmental degradation caused by municipal solid waste is becoming increasingly pressing despite the importance of recycling challenges such as contamination and the need for market demand for recycled materials persist addressing these challenges requires a comprehensive understanding of waste composition innovative technologies and effective policies municipal solid waste management and recycling technologies serves as a solution offering a deep dive into the complexities of municipal solid waste recycling and providing insights that can drive sustainable

waste management practices by delving into topics such as the role of education and awareness campaigns technological advancements in waste sorting and the economic aspects of recycling this book equips readers with the knowledge needed to make a meaningful impact it explores innovative recycling technologies social and environmental implications successful case studies and strategies for reducing contamination in recycling processes the book also highlights the importance of collaboration among researchers policymakers and stakeholders to implement effective waste management systems

natural molecules in neuroprotection and neurotoxicity brings together research in the area of natural compounds and their dual effects of neuroprotection and neurotoxicity when interacting with brain cells this book is organized into four sections that address molecular mechanism underlying neuroprotection and neurotoxicity neuroprotection mediated by natural molecules neurotoxicity induced by natural compounds and nanotechnology related strategies utilized in neuroprotection written by well known researchers all over the world chapters provide an in depth analysis of numerous molecules such as algae plant and fungus derived molecules and comprehensively discuss their mechanisms of action and possible clinical applications this book provides an essential reference for researchers and clinical scientists interested in the effects of natural compounds on the human health and disease covers both neuroprotective and neurotoxic outcomes resulted from the exposure of brain cells to natural molecules analyzes numerous natural compounds including animal vegetal fungal bacterial and marine derived molecules discusses the effects of the metabolism of microbiota on the biotransformation of natural molecules and the consequences of these processes on brain cells contains a section focused on the nanotechnology related strategies utilized to enhance the bioavailability of natural molecules to brain cells

sustainable concrete materials and structures focuses on recent research progress and innovations in this important field of research all aspects of the

technical routes to sustainable concrete and structures are discussed in detail these include recent findings on sustainable concrete production and structural design and construction low carbon cement sustainable concrete mix design durability and structural applications are discussed in detail emphasis is placed on how to bring some of the innovations in concrete technology closer to market information on techno economic analysis economy of scale and the supply chain of sustainable concrete is also addressed the book will be an essential reference resource for academic and industrial researchers working in civil engineering material science chemical engineering and the development and manufacture of construction materials provides a comprehensive collection of technical reviews on the latest advancements in sustainable concrete materials and structures presents state of the art research on preparation production processing and implementation techniques for sustainable concrete materials and structures features techno economic analysis for each technology discussed covers lifecycle assessment the circular economy and end of life of concrete structures includes industry case studies on implementation

spaceplanes from airport to spaceport presents a coherent lucid and optimistic picture of the future of the near future space vehicles may soon take off from international airports and refuel in space new technologies could allow flights to take off regularly between the earth and the moon the technical details presented explain precisely how all this can be accomplished within the next few decades this book also explains why the space tourist market could easily become the single most important factor in the mid term future development of space transportation in a few years it will be possible to board a spaceplane and fly into earth orbit and perhaps visit a space station later development could include refuelling in orbit to take a tour of cislunar space the book s solid engineering foundation will be of interest to both space exploration enthusiasts and future space travelers
