the t t clark companion to atonement establishes a vision for the doctrine of the atonement as a unified yet extraordinarily rich event calling for the church s full appropriation most edited volumes on this doctrine focus on one aspect of the work of christ for example girard feminist thought penal substitution or divine violence the companion is unique in that every essay seeks to both appropriate and stimulate the church s understanding of the manifold nature of christ s death and resurrection the essays are divided into four main sections 1 dogmatic location 2 chapters on the old and new testaments 3 major theologians and 4 contemporary developments the first set of essays explore the inter relationship between the atonement and other christian doctrines for example trinity christology and pneumatology opening up yet further avenues of inquiry essays on key theologians eschew reductionism striving to bring out the nuances and breadth of the contribution the same is true of the biblical essays the final section explores more recent developments within the doctrine for example the work of rene girard and the ongoing reflection on holy saturday the book is comprised of 18 major essays and an a z section containing shorter dictionary length entries on a much broader range of topics the result is a combination of in depth analysis and breadth of scope making this a benchmark work for further studies in the doctrine

fluorescent dye labels and stains the only comprehensive database of fluorophores and their physical and photochemical properties fluorophores are chemical compounds that strongly absorb in the ultraviolet visible and or near infrared and with bright emission in these ranges as a result they are exceptionally valuable as dyes for various analytical processes capable of labelling and staining particular targets for purposes of fluorescent imaging sensitive detection and quantification exhibiting linear responses over very wide concentration ranges these compounds are many and varied and panoramic views of their options physical properties and their reactions to light excitations can be critical to their successful integration into chemical analysis pharmaceutical analysis clinical analysis microscopies optical bioimaging cancer imaging real time pcr flow cytometry multiplexing in proteomics life sciences in general and many other high tech fields material sciences traceability photovoltaics quantum computing fluorescent dye labels and stains incorporates a comprehensive database of such substances and their characteristics it provides an introduction to basic theories and foundational terminology in addition to both the molecular structures and photophysical properties of an enormous range of fluorophores assembled over the course of a distinguished career in biochemistry this database presents valuable information that has never before been available in a single volume readers will also find molecular and

photochemical information of over 700 fluorophores a database of parameters including light excitation ranges molar absorption coefficients fluorescence quantum yields molecular brightness and many more information derived from multiple disciplines including microscopy nanoscopy biochemistry and molecular biology fluorescent dye labels and stains is the essential reference for pharmaceutical and biomedical researchers and professionals academics who study molecular biology or organic chemistry and any professional whose work includes strong and photostable molecular absorptions and fluorescence
